

Consulting on REACH & CLP

GEELIO Umwelttechnologie GmbH

About GEELIO

- GEELIO Germany founded in 2007 in Mannheim
- GEELIO China founded in 2008 in Shanghai
- Interdisciplinary team of researchers from Chemistry, Environment Technology, Biology, Physic and computer science
- Consulting on REACH & CLP Regulation in multi-languages (English/German/Chinese)
- Global range of customers:
 - Asia: P.R.China, R.O.China, Malaysia, India ect.
 - Europe: Germany, Switzerland, the Netherlands
- REACH Qualification:
 - since 2008
 - Member of REACH NET Expert (Germany)
 - Member of Helsinki REACH Centre (Finland)

Office Mannheim

Office Shanghai

What is REACH?

- REACH is a new European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the **Registration, Evaluation, Authorisation and Restriction of Chemical substances**. The new law entered into force on 1 June 2007.
- The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.
- REACH gives greater responsibility to industry to manage the risks from chemicals and to provide safety information on the substances. Manufacturers and importers will be required to gather information on the properties of their chemical substances, which will allow their safe handling, and to register the information in a central database run by the European Chemicals Agency (ECHA) in Helsinki.
- In principle REACH applies to all chemicals: not only chemicals used in industrial processes but also in our day-to-day life, for example in cleaning products, paints as well as in articles such as clothes, furniture and electrical appliances.

NO DATA NO MARKET

The logo for REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) is displayed in a stylized font. The word "REACH" is written in a bold, teal-colored sans-serif font. The letters are set against a light blue rectangular background that has a subtle gradient and a thin dark border.

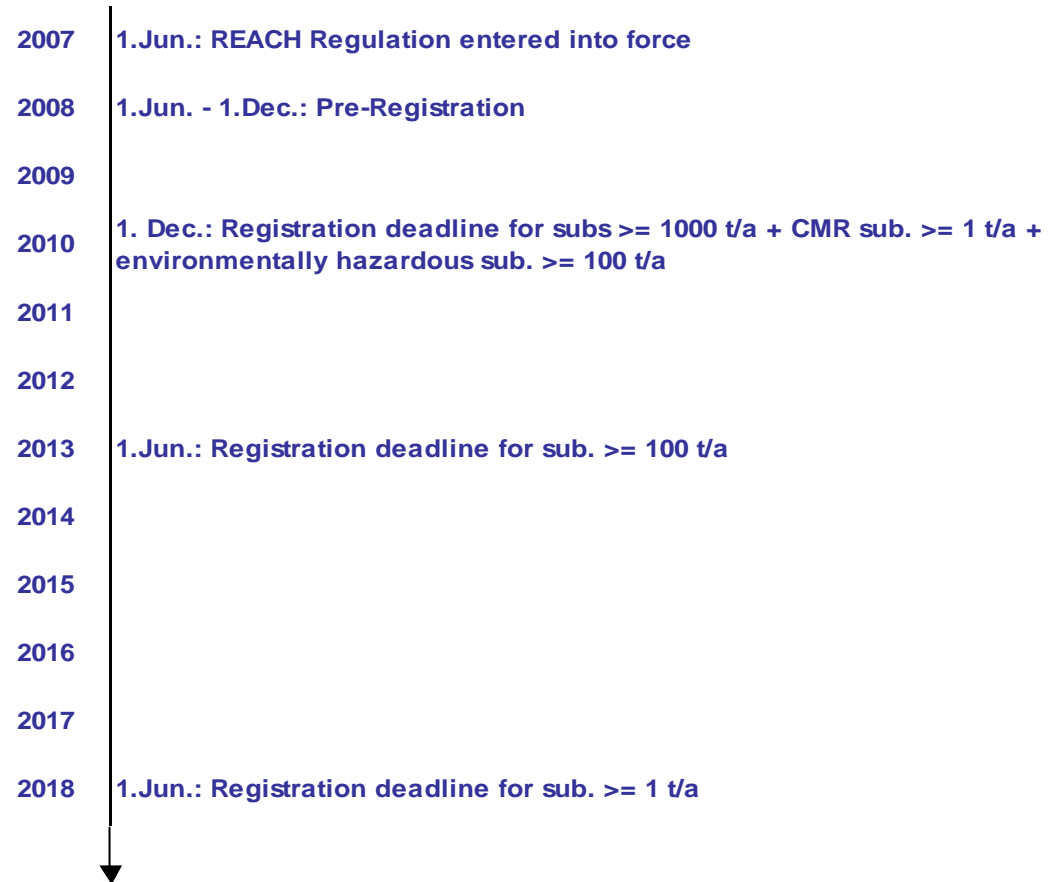

What is CLP?

- CLP Regulation is the new European Regulation on **C**lassification, **L**abelling and **P**ackaging of chemical substances and mixtures. The legislation introduces throughout the EU a new system for classifying and labelling chemicals, based on the United Nations' Globally Harmonised System (UN GHS).
- CLP stands for Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures, amending and repealing directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (REACH). It came into force on 20 January 2009 and applies across the European Union.
- CLP is about the hazards of chemical substances and mixtures and how to inform others about them. It is the task of industry to establish what are the hazards of substances and mixtures before these are placed on the market, and to classify them in line with the identified hazards. In case a substance or a mixture is hazardous, it has to be labelled so that workers and consumers know about its effects before they handle it. Note that "mixture" means the same as the term "preparation" which has been used so far.

The logo consists of the letters 'CLP' in a bold, sans-serif font. The 'C' and 'L' are white and positioned on a light blue rectangular background. The 'P' is white and positioned on a darker blue rectangular background. The two background rectangles are adjacent and of equal height, creating a split-color effect.

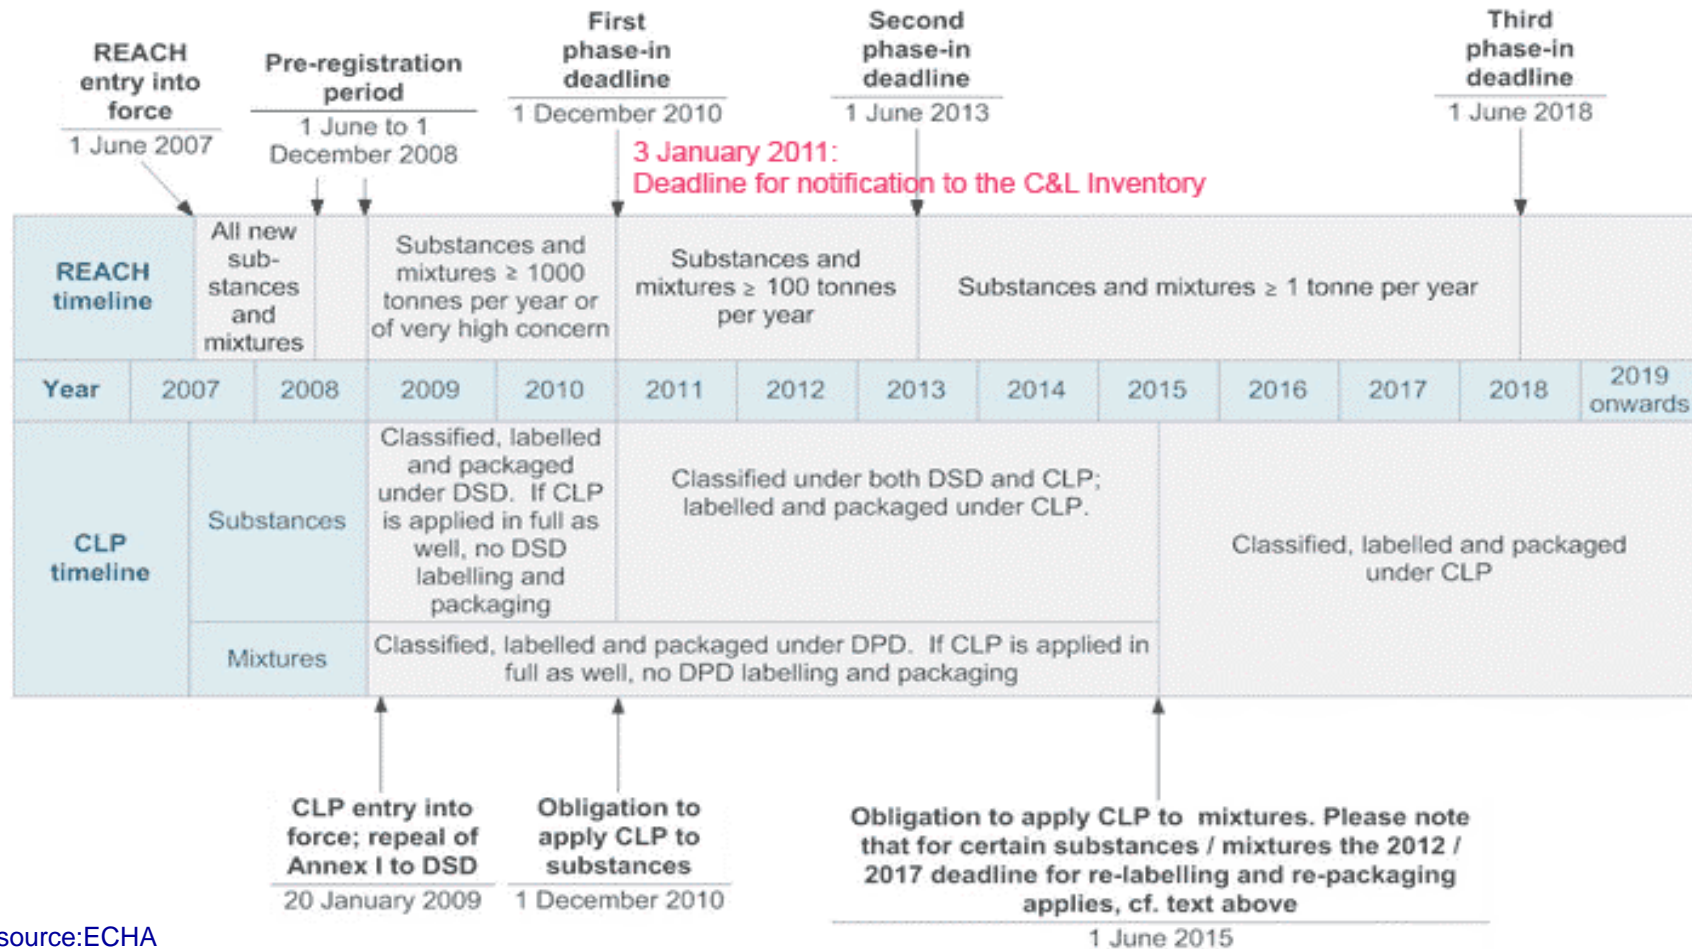

CLP

REACH Registration deadline phase-in substance

Non phase-in substance may only be manufactured or placed on the market in the European Community if they have been first registered by the manufacturer or importer.

Transition to CLP

source:ECHA

We offer services for manufacturers and importers as well as companies within the distribution chain of chemical substances (downstream users) in all areas covered by REACH Regulation. Our service on REACH & CLP Regulation contain:

- Only representative service
- Substance identification service
- Late pre-registration service
- SIEF participation service
- SIEF Formation Facilitation (SFF) Service
- Database analysis service
- Testing advice service
- Registration dossier service
- Safety data sheet (SDS) service
- Lead registrant (LR) service
- Inquiry service
- CLP notification service
- Authorisation service

We are looking forward to answering your queries and ensure that we are helpful in every possible way.
